Global Tracking Coverage using Cellular, Satellite Service with Effortless Management.

GLOBAL TRACKING MANAGEMENT

Track any device, anywhere via Cellular networks, Satellite, Radio or any combination. Simplex-Mode, Dual-Mode and Tri-mode devices available. Battery, Solar, Vehicle and combination powered devices available. Sensor suites for Temperature, Tamper, Humidity, Moisture, Light, Shock, Tilt, Vibration, etc. available.

Status reporting available online via web, SMS, Email, Phone, etc.

See example demo service: http://track.critical-data.systems/track/Track

Available reports:

- **Trip Detail Report** - Displays the start time/location, and stop time/location, of various "trips" made within the selected date range.
- **Geozone/Geofence Report** - Displays the arrival times and departure times of various travelled geozones/geofences, with the total amount of time spent within each geozone/geofence.
- **Geozone/Geofence Arrival Report** - Displays the time spent within each geozone/geofence.
- **Geozone/Geofence Departure Report** - Displays the departure time and driving time between each geozone/geofence
- **Ignition Detail/Summary Reports** - Displays the time between various Ignition On and Ignition Off events within the selected date range.
- **Digital Input Detail Report** - Displays the time between various Digitial Input on and off events within the selected date range.
- **Temperature Monitor Report** - (requires temperature sensor support) Displays a report and graphs of temperature values.
- **OBD Fault Code Report** - (requires J1939/CANBUS support) Displays engine diagnostice fault codes.
- **OBD Detail Report** - (requires J1939/CANBUS support) Displays engine diagnostice detail information.
- **Periodic Service Report** - (requires vehicle or GPS-based odometer) Displays periodic maintenance/service information.
- **Distance Traveled Report** - (requires vehicle or GPS-based odometer) Displays the distance travelled for various devices within the selected date range.
- **Fuel Usage Summary Report** - (requires J1939/CANBUS support) Displays the Engine hours, Total fuel used, Idle hours, Idle fuel used, Work hours, Work fuel used, PTO hours, PTO fuel used, Miles driven, and Fuel economy for devices within the selected date range.
- **User Login Report** - Displays the login times for various users within the account.
- **Account Login Report** - (System Admin only) Displays the last login times for various accounts within the system.
- **Unassigned Devices Report** - (System Admin only, Requires device communication server support) Displays a list of devices which have attempted to send data to the server, but have not yet been assinged to an account/device record.
- **Session Connection Status Report** - Displays the wireless data usage estimates for various devices.

And other custom reports.
